

You'll get know

- the possibilities to use laser as a designers tool and its creative potential
- simply process how to design and cut or/and engrave flat materials with laser
- we'll work with Epilog laser machine, cardboard, heat transferpaper and light fabric or nonwoven material

Draw freely and bring some A5 sketches with you:

A) black ink figure with continuous black area,
so all kinds of black shapes are involved each other

B) black small ink figures
surrounded by white continuous area

Figures here just inform the idea. We'll use simply Adobe Illustration tool in workshop: BlobBrush Tool. Dont hesitate partizipate without experience. If you know the tool, please draw yours by using it.
